

Desigo™ PX

# Automation stations modular series

PXC....D PXC...-E.D PXA40-...

- Freely programmable modular automation stations for HVAC and building services plants.
- Communications
  - BACnet/IP
  - BACnet/LonTalk
- BTL label (BACnet communications is BTL tested)
- Comprehensive management and system functions (alarm management, time schedules, trends, access protection, etc.)
- Connection of TX-I/O modules with any data point mix
- Connection of TX Open modules for the integration of third-party devices
- Integration of LONMARK®-compatible devices
- Integrated web server for generic operation
- For stand-alone applications, or for use within a device or system network
- Scalable range of touch panels and local and remote operating devices

Validity

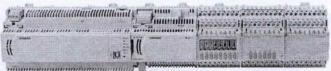

This data sheet is valid for firmware Desigo V6.1 and higher. For older devices / firmware see data sheet CM1N9222en 13.

CM1N9222en\_16 2020-05-30

**Smart Infrastructure** 

Modular, freely programmable automation stations for HVAC and building control systems.

- Management functions (alarm management with alarm routing, schedulers, trend functions, remote management, access protection with individually defined user profiles and categories).
- · For stand-alone applications or for use within a device or system network.
- BTL-tested BACnet communications on LonTalk, PTP or IP, compliant with BACnet standard (Rev. 1.12 -for Desigo V6.0 and later) including B-BC profile.
- AMEV profiles AS-A and AS-B to recommendation "BACnet 2011 Version 1.2 (for Desigo V6.0 and later)".
- Freely programmable, using the D-MAP programming language (close resemblance to CEN standard 11312). All function blocks, available in libraries, can be graphically connected.
- · Engineering and commissioning using the Desigo Xworks Plus tool.
- Connection of field devices to a customized mix of TX-I/O modules.
- Connection of installed PTM-I/O modules the perfect solution to migrate legacy systems.
- Connection of TX Open modules to integrate third-party devices such as variable speed drives, pumps or energy counters.
- · Connection of detached I/O islands with integration.
- · Connection of LonMark® compatible devices
- Low voltage protection and start-up management to protect the devices against fluctuating voltage.
- · Scalable range of touch panels, Web solutions and operator units.

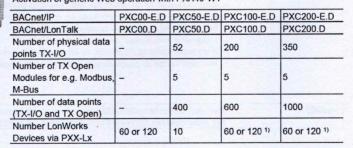

Modular automation station with connected TX-I/O modules

Connection of TX-I/O modules, TX Open modules, PTM-I/O modules via PXX-PBUS and LonWorks devices via PXX-L11/12.

Activation of generic Web operation with PXA40-W1

In concurrent use with TX-I/O modules, the number of devices is reduced in relation to capacity

Extension capabilities of the automation stations

Siemens Smart Infrastructure

TXM1..: The flexible range of TX-I/O modules for signaling, measuring, counting, switching, and positioning. The I/O modules with local manual control on the module housing permit the operator to control the equipment manually directly from the cabinet.

TX-I/O devices 1)		Туре	Data sheet
Digital input module 8 or 16	I/O points	TXM1.8D,	CM2N8172
		TXM1.16D	
Universal module withou	t / with local	TXM1.8U,	CM2N8173
operation and LCD		TXM1.8U-ML	
Super universal mod. withou	t / with local	TXM1.8X,	CM2N8174
operation and LCD		TXM1.8X-ML	
Relay module withou	t / with local	TXM1.6R,	CM2N8175
operation		TXM1.6R-M	
Resistance measuring module	e (for Pt100 4-wire)	TXM1.8P	CM2N8176
Relay module bistable		TXM1.6RL	CM2N8177
Triac module		TXM1.8T	CM2N8179
Power supply module 1.2 A,	Fused 10A	TXS1.12F10	CM2N8183
Bus interface module,	Fused 10A	TXS1.EF10	CM2N8183

<sup>1)</sup> TXM1... und TX Open modules require TXS1.12F10 power supply modules.

**TX Open : Flexible TX Open platform** to integrate third-party systems and devices such as Modbus or M-Bus. Tested integrations solutions and applications based on our large know how.

TX Open devices 1)	Martin Wald Son William	Туре	Data sheet
TX Open module	up to 40 data points	TXI2-S.OPEN	CM1N8187
TX Open module	up to 160 data points	TXI2.OPEN	CM1N8187

<sup>1)</sup> TXM1... und TX Open modules require TXS1.12F10 power supply modules.

**PXX-L11/12..:** Extension modules allow for flexibly connecting LonWorks devices such as room controllers and third- party devices.

PXX devices 2)	Туре	Data sheet
Integration of max. 60 devices (PXC50D: max. 10 devices)	PXX-L11	CM1N9282
Integration of max. 120 devices (PXC50D: max. 10 devices)	PXX-L12	CM1N9282

<sup>2)</sup> A high number of LonWorks devices reduces the performance of the PXC for connected TX-I/O or PTM-I/O data points respectively.

PXX-PBUS : The extension module allows connecting installed PTM-I/O modules to PXC50/100/200...D automation stations, making them the perfect solution to migrate legacy systems.

PXX device	Type	Data sheet
PBUS extension module	PXX-PBUS	CM1N9283

Note: One supply module TXS1.12F10 is required as bus supply for the P-bus for each P-bus strand. A TXS1.12F10 can supply max. 64 load units (1 LU = 12.5 mA, DC 24 V)

TXA1.IBE: Remote IO Islands with Integration

Easy to use solution via simple adapter for remote TX-I/O and TX Open. No programming/ parameterization required.

Device	Type	Data sheet
Island bus expansion module	TXA1.IBE	CM2N8184

Siemens Smart Infrastructure

PXC....D PXC...-E.D + PXA40-... – Automation stations modular series

CM1N9222en\_16 2020-05-30

The compact construction enables the automation stations to be mounted on a standard mounting rail.

PXC....D

	And Contract Supplied to the second supplied to the second
1	Plastic housing
2	Cover to interface for extension module
3	Front cover or PXM40-W1 option module
4	Plug-in terminal block with screw terminals (operating voltage)
5	Interface for network, operator units, tool, etc.
6	LED display for devices and system status
7	Island bus connector (not on PXC00)
8	Slider for mounting on DIN rail
9	Battery for real time clock (Lithim Typ CR2032): Backup during power breakdown.
10	Battery for trend data and present parameters (Lithium Typ FR6/AA): Backup during power breakdown.

- Backup during power breakdown.

  Reset pin: Pressing the pin forces a restart.

  Firmware pin: If the pin is pressed during restart (reset), the present DMAP program is deleted from the FLASH.
- 13 Service pin: To identify the automation station in the IP network / LonWorks network during commissioning.

#### Color Activity Function LED **LED** indicators Continuously ON Power OK RUN Green Continuously OFF No power RUN OK Continuously OFF Red FLT ■ FLT 2 Fault Continuously ON BAT Firmware missing / corrupt Rapid flashing □ COM Battery OK BAT Red Continuously OFF INF Continuously ON Battery empty- replace! #### **Battery change**

1) If one of the batteries has low charge the "BAT" LED lights up ant the automation station sends a system event.

Remaining battery life after a "Low batt" event:

Battery for real time clock (Type CR2032): several days.

 Battery for trend data and present parameters (Type AA Lithium): approx. 15 hrs. Alkaline: several days.

As long as there is an external power supply, the battery may be removed for

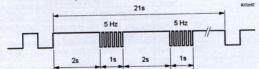

unlimited time.
To prevent hardware damage by electrostatic discharge (ESD), a wrist strap with earth cable must be used during the battery change.

Note the special disposal notes on Li batteries.

Note the special disposal notes on a batterior.
 Devices Series A: Do not replace an alkaline battery with a Lithium battery!

#### Disposal

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
- Dispose of empty batteries in designated collection points.
   Lithium batteries: May catch fire, explode or leak. Do not short circuit, charge, disassemble, dispose of in fire, heat above 100 °C, or expose to water.

Disposal: Seal battery terminals with tape.
